ATTENDEE ANALYSIS

#

JORDAN RIVERA - VP OF ENGINEERING

- **Name & Role:** VP of Engineering
- **What they likely care about:** System architecture, technology stack, development timelines, integration with existing systems, scalability, and technical debt.
- **Anticipated objections or questions:** "How will this platform integrate with our current systems?" "What are the technical challenges?" "Can we build this in-house?"

#

PRIYA SHARMA - MD CONTACT CENTER OPERATIONS

- **Name & Role:** Managing Director of Contact Center Operations
- **What they likely care about:** Operational efficiency, customer experience, impact on agent workflows, and performance metrics.
- **Anticipated objections or questions:** "How will this affect our contact center metrics?" "What are the expected improvements in customer satisfaction?" "How will this impact our agents?"

#

DAVID CHEN - SVP OF STRATEGY

- **Name & Role:** Senior Vice President of Strategy
- **What they likely care about:** Alignment with corporate strategy, return on investment (ROI), competitive advantage, and long-term vision.
- **Anticipated objections or questions:** "What is the strategic value of this investment?" "How does this align with our overall business goals?" "What is the projected ROI?"

#

ANGELA MARTINEZ - VP OF LEGAL, RISK & COMPLIANCE

- **Name & Role:** VP of Legal, Risk & Compliance
- **What they likely care about:** Data privacy, compliance with regulations (e.g., GDPR, CCPA), risk management, and legal implications.
- **Anticipated objections or questions:** "What are the compliance risks?" "How will we ensure data privacy?" "Are there any regulatory challenges we need to address?"

#

STEVE SMITH - HEAD OF CYBERSECURITY

- **Name & Role:** Head of Cybersecurity
- **What they likely care about:** Security architecture, threat mitigation, incident response, and data protection.
- **Anticipated objections or questions:** "What security measures are in place?" "How will we ensure data security?" "What is the incident response plan?"

YOUR STRONGEST TALKING POINTS

1. **Strategic Alignment:** Emphasize how the conversational AI platform will significantly enhance customer experience, streamline operations, and align with the company's long-term strategic goals, ensuring a strong return on investment.
2. **Operational Efficiency:** Highlight the potential to reduce contact center handling times by over 40%, freeing up agents to focus on more complex customer issues and thereby improving overall contact center efficiency.
3. **Compliance and Risk Management:** Address data governance, privacy, and compliance concerns head-on, showcasing robust mechanisms to ensure the platform meets all regulatory requirements and minimizes legal risks.
4. **Security Robustness:** Detail the advanced cybersecurity measures in place to protect sensitive data and ensure the platform is resilient against potential threats, reassuring stakeholders of the platform's security.
5. **Phased Rollout Plan:** Present a well-structured phased rollout plan that allows for gradual integration, monitoring, and adjustment, minimizing disruption and maximizing the platform's effectiveness across different business units.

THE ONE QUESTION YOU MUST ASK

"How can we ensure that the implementation of this conversational AI platform not only meets our operational goals but also enhances our competitive positioning in the market?"

RECOMMENDED TONE & APPROACH

For this meeting, adopt a confident and direct communication style, emphasizing the strategic benefits and operational efficiencies of the conversational AI platform. Pace the conversation to first address technical and compliance concerns, ensuring stakeholders feel reassured about the robustness of the solution. Transition

smoothly to discussing the strategic value and long-term benefits, framing the conversation around how this investment will drive the company forward. Be prepared to delve into specifics when questions arise, demonstrating a deep understanding of both the technical and strategic dimensions of the project.
